

OUR 3 AREAS OF EXPERTISE

CONTROL

COMAP's control solutions make it possible to provide the right flow in the right place in heating, air-conditioning or hot water systems.

CONNECTIONS

COMAP offers a wide range of complete PER, copper and multilayer connection systems.

WATER QUALITY

COMAP solutions are based on soft technologies and are more environment friendly, resulting in healthy and high quality water in residential buildings.

COMAP

A leading partner in thermal and sanitary solutions, striving for the comfort and environmental performance of buildings.

French experts for nearly 100 years in the fields of plumbing and HVAC, our solutions integrate harmoniously into living areas. With nearly 1000 employees, we design and manufacture control-regulation, connection and water quality technology. They enable intelligent management of water and energy and contribute to the comfort and well-being of occupants worldwide.

COMAP is part of the Aalberts Industries NV Group which has achieved a turnover of 2,759 billion euros in 2018.

Aquatis

Smart water
ultrafiltration unit

COMAP

AQUATIS, SMART SOLUTION FOR THE QUALITY OF THE WATER.

In France, the tap water is of very high quality. However, it is sometimes loaded with pesticides and bacteria, beyond the authorized limits.

To enjoy good quality water at home, COMAP has invented Aquatis. You will rediscover the good taste of water, the flavour of tea and coffee while keeping all minerals for good for the health.

3 LEVELS OF FILTRATION

1. Sediments, taste and the smell of chlorine thank to natural activated carbon 10µm.
2. Pesticides and herbicides thanks to natural activated carbon at 10µm.
3. Bacteria and viruses with hollow fiber membrane at 0.1µm.

AQUATIS PERFECTLY INTEGRATES IN YOUR KITCHEN.

Aquatis is a solution to improve the quality of drinking water which filters water naturally while retaining its original minerals.

It guarantees the good quality of water in the time thanks to automatic control of consumables wear.

SOLUTIONS COMPARISON

FEATURES	Aquatis	Filters jugs	Other solutions*
Retains sediments and particles present in the water.	✓	✓	✓
Guarantees a water without bacteria or viruses.	✓	-	✓
Removes the bad taste and the smell of chlorine.	✓	✓	✓
Preserves the minerals good for the health.	✓	✓	-
Filters pesticides et herbicides.	✓	△	✓
Controls and automatically informs of consumables wear.	✓	-	-
Ecology: works without overconsumption or water discharge.	✓	✓	Up to 5L of water lost for 1L treated.

✓ Yes - No △ Level of treatment depending on the type of solutions

*Reverse osmosis solution

Install Aquatis under your sink, and forget about it until it informs you automatically when consumables need to be replaced, to ensure that your water stays of exceptional quality.

A young girl with blonde hair is shown in profile, drinking water from a clear glass. She is wearing a pink shirt with a colorful polka-dot pattern. The background is white, and there are teal decorative shapes in the top-left and bottom-right corners.

AQUATIS: QUALITY WATER

FOR THOSE YOU LOVE.

Aquatis assures a very high quality tap water for all of your family while maintaining its original minerality (calcium, magnesium...) and so its natural benefits.

Its natural filtration holds back:

- The sediments and the particles suspended in the water,
- the pesticides and herbicides to which are exposed several million people every year,
- the bad taste and the bad smell of chlorine,
- the bacteria and the viruses.

AQUATIS CONTROLS FILTERS WEAR.

Equipped with a sound indicator Aquatis informs you when the cartridges need to be replaced to ensure an optimal filtration overtime.

DID YOU KNOW?

Several studies concluded that filters jugs can increase the concentration of bacteria of the filtered water and causes a release of silver salts when they are out of order.*

*When water is stored for several hours or that the cartridges are not replaced in time.

A TAP TO SAVE CONSUMABLES LIFE

Aquatis ensures the finest level of filtration possible keeping the minerality of your water.

To avoid the waste of your filter cartridges, we provide a double inlet tap that allows you to use the filtered water from Aquatis only when necessary! For dishes, the unfiltered water is enough.

EASE OF INSTALLATION

Aquatis quickly fits under a sink.

- + Dashboard with light and sound indicators of consumables wear.
- + Small footprint: less than 50cm necessary under your sink.
- + Filter cartridges easily changeable, with a key provided.

Allow 9cm below the Aquatis to replace the cartridges easily.

Installation by a professional is recommended. All the material for a simple and fast connection to an existing installation is provided.

THE ENVIRONMENT-FRIENDLY ALTERNATIVE.

Aquatis is free from any chemical treatment and does not cause any discharge of water to wastewater unlike other solutions.

Up to 5 liters of water are rejected for 1 liter of water treated for reverse osmosis. This may represent over 6000 liters a year for a family of 4.

TO PRODUCE A BOTTLE OF MINERAL WATER:

For 1.5 L of mineral water, you need:

- 150mL of oil
- 120g of coal
- 63 L of gas
- 3 L of water

For 1.5 L of tap, you need:

- 1.5 L tap water

TO RECYCLE A PLASTIC BOTTLE:

Millions of plastic bottles are buried everyday underground. It will need 1000 years to biodegrade.

COMAP solutions for improvement of water quality are elaborated, made and controled in Abbeville factory, in the Somme, that is certified ISO-9001. For more than 30 years, these solutions are reknown to answer to the most rigorous requirements in terms of water quality.

The COMAP teams have a great expertise in the conception of solutions that allow a better water managment.
