

Save on material and installation costs

FALX in portrait orientation

- **LESS MATERIAL**
With Falx in portrait orientation you save about 30% on material costs such as clips, blocks and rails.
- **FASTER INSTALLATION**
Less installation material also means that your panels are installed even faster.
- **MORE FLEXIBILITY**
Falx in portrait orientation offers improved flexibility on roofs with limited space.

10% HIGHER YIELD

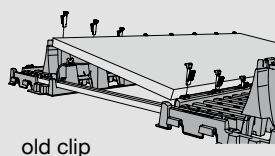

Falx in portrait orientation delivers almost 10% more coverage than in a back-to-back PV-panel setup.

IMPROVED CLIP: FALX CLIP HD

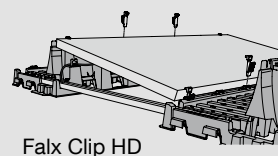

The Falx clip is improved, has more grip and can be used in both portrait and landscape orientations.

Use the Falx Clip HD in the landscape orientation and save about 40% on the number of clips!

FALX SAVES

Falx saves you a lot on installation time and costs. The new Falx Clip HD delivers even more savings and reduces the number of clips needed by about 40%.

When combined with the extended rail, this clip also enables a portrait orientation to give you maximum savings. The following examples will make this clear.

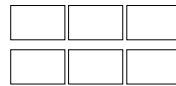

EXAMPLE 1*

Landscape
(with old clip)

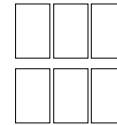

Falx Clip	96
Falx Mounting Block	24
Falx Rail	16

Landscape
(with Falx Clip HD)

Falx Clip HD	54
Falx Mounting Block	24
Falx Rail	16

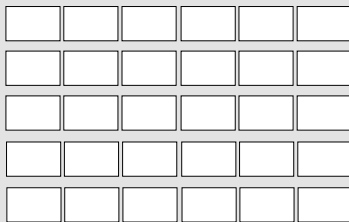

Portrait

Falx Clip HD	60
Falx Mounting Block	15
Falx Rail	10

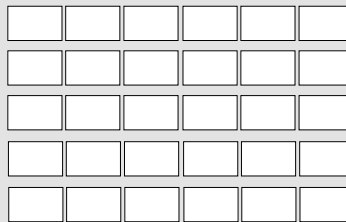

EXAMPLE 2*

Landscape
(with old clip)

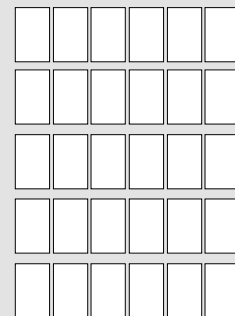

Falx Clip	450
Falx Mounting Block	90
Falx Rail	60

Landscape
(with Falx Clip HD)

Falx Clip HD	270
Falx Mounting Block	90
Falx Rail	60

Portrait

Falx Clip HD	270
Falx Mounting Block	54
Falx Rail	39

* Necessary ballast remains the same. Calculations should be performed by Flamco.

Falx Clip HD		
Type	Weight [kg]	Flamco number
