Flamco
Flow of Innovation

More comfort, less consumption.

Flamco *XStream*
Air and Dirt Separators

ECO
MAX

The Smart Innovation for Heating Installations. with Extreme Effect.

- With unique ECO / MAX mode
- Optimal installation convenience
- Less wear and tear, less chance of nuisance malfunctions
- Minimal heat loss through integrated insulation
- Up to 15% lower energy consumption thanks to improved system performance

Flamco *XStream*

Air and Dirt Separators

### Flamco XStream Vent

Air separator

1

Free Air leads to system energy loss and rust formation. The Flamco XStream air separator automatically flushes your heating system.

2

Air bubbles in your heating system cause sounds such as hissing and bubbling. This is a thing of the past with the Flamco XStream air separator.

Flamco XStream Clean

Dirt separator

3

Your heating system always contains minuscule dirt particles. This will lead to extra wear and malfunctions of system components in the long term. You can prevent this with the Flamco XStream dirt separator.
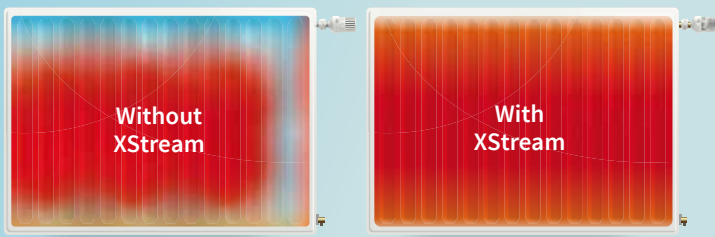

4

Less wear means that your boiler will last longer. Up to 3 years longer, a considerable saving.

The Flamco XStream effect:

1 Up to **15% less** energy consumption of the heating system*

2 Automatic venting: **additional comfort** for users

3 **Less** wear and less chance of **break-down**

4 Up to **6% more** efficiency of the heating system*

5 **ECO/MAX mode** Optimal **capture** of **air** and **dirt**

Another XStream effect:
Your radiators give up to 60% more heat.

Without XStream

With XStream

ECO / MAX

5

ECO / MAX mode

After installation or maintenance your installation contains a relatively large amount of air and dirt. In the MAX mode, air and dirt are removed in an instant. During normal use, the ECO mode is sufficient. Even then, air and dirt are effectively removed. Your installer ensures that your Flamco XStream is in the correct position, so you do not have to worry about this.

* Calculated according to the Hysopt method in a system with a gas boiler and manually operated radiator valves
